PROFESSIONAL SUMMARY

Microsoft Certified Power Platform Developer with nearly 4 years of experience designing, developing, testing, deploying, and supporting enterprise applications using Microsoft Power Platform and Dynamics 365 CE. Experienced in Power Apps (Model-Driven Apps), Power Automate, Dataverse, Power Pages, JavaScript, C#, Azure DevOps, and enterprise system integrations.

Skilled in translating business requirements into scalable technical solutions, automating business processes, collaborating with stakeholders, conducting testing, maintaining technical documentation, and delivering applications through Agile and SDLC methodologies. Experienced in managing solution deployments using Azure DevOps and CI/CD practices while ensuring application quality, security, and performance.

TECHNICAL SKILLS

Microsoft Dynamics 365 CE, Dynamics 365 CE (Sales, Customer Service), Microsoft Power Platform, Microsoft Dataverse, Power Apps (Model-Driven Apps), Power Pages (Power Portals), Power Automate Cloud Flows, C#, .NET Framework, JavaScript, Plugin Development, Custom Plugins, Custom Workflow Activities, Custom Actions, Business Rules, Forms, Views & Dashboards, Security Roles, Field-Level Security, REST APIs, Web APIs, OData, Custom Connectors, Git, ALM & CI/CD, CI/CD Pipelines, Solution Management, Managed & Unmanaged Solutions, Data Migration, SharePoint Integration, Azure Blob Storage, Unit Testing, SonarQube, Liquid JS, Agile Scrum, Requirements Gathering, Technical Design, CRM Customization, Enterprise Application Integration, Power Platform Development, Dynamics 365 Customization, Solution Deployment, Environment Management, Code Reviews, Technical Documentation, Application Lifecycle Management (ALM), Test Automation, Workflow Automation, Client Collaboration, Troubleshooting, Performance Optimization. Power Apps (Canvas Apps - Training & POC), Power BI (Training & POC), Business Process Automation, Requirement Analysis, Solution Design, Software Development Life Cycle (SDLC), Application Testing, Business Analysis, Code Quality, Error Handling, Logging, Naming Conventions, Deployment, Operational Support, Release Management

CERTIFICATIONS

- PL-400 – Microsoft Power Platform Developer Associate
- PL-200 – Microsoft Power Platform Functional Consultant Associate
- PL-900 – Microsoft Power Platform Fundamentals

PROFESSIONAL EXPERIENCE

Kerv Digital (Formerly CloudThing India Pvt Ltd)

Software Engineer – CRM

August 2022 – Present

KEY RESPONSIBILITIES & ACHIEVEMENTS

- Developed and customised Microsoft Dynamics 365 CE solutions using Plugins, Workflows, Custom Actions, JavaScript, and Power Automate Flows.
- Built GOV.UK and WCAG-compliant Power Pages applications for public sector clients.
- Integrated Dynamics 365 with external systems using Web APIs and REST APIs.
- Developed secure authentication and authorisation solutions aligned with enterprise security requirements.
- Managed solution deployments using Azure DevOps pipelines across multiple environments. Maintained code quality standards using SonarQube.

- Implemented unit testing for Plugins, JavaScript, and Workflows to improve code quality and maintainability.
 - Collaborated with clients and stakeholders to gather requirements, demonstrate solutions, and provide technical recommendations.
 - Participated in Agile ceremonies including sprint planning, backlog refinement, code reviews, and retrospectives.
-

PROJECT EXPERIENCE

Driver Services Platform (DSP)

Client: DVSA & Kainos

- Developing and enhancing digital services supporting driving test operations across Great Britain.
- Designing Dynamics 365 CE and Power Platform solutions to improve operational efficiency and customer experience.
- Implementing automation workflows and scalable CRM components supporting self-service capabilities.

Commercial Vehicle Services (CVS) – Approvals Transformation Implementation

Client: DVSA & BJSS

- Redesigned CRM functionality and removed redundant components to improve application performance.
- Worked directly with business stakeholders to gather, analyse, and document business requirements.
- Designed technical solutions and implementation approaches based on business use cases.
- Participated in end-to-end Software Development Lifecycle, including requirement analysis, design, development, testing, deployment, and production support.
- Performed code reviews, unit testing, and maintained coding standards to ensure application quality.
- Maintained technical documentation, including deployment procedures, solution designs, and testing documentation.
- Collaborated with cross-functional teams to prioritise enhancements and deliver business value.
- Customised Dynamics 365 CE solutions and transitioned business processes from Plugins to Power Automate Flows.
- Developed and deployed Power Pages applications, improving performance and user experience. Designed notification and approval workflows supporting vehicle testing processes
- Implemented Liquid JS-based Smart Forms for complex online application journeys.
- Integrated Power Pages with SharePoint and Azure Blob Storage. Automated PDF generation using Word templates and Power Automate.
- Implemented automated testing practices for Plugins, Workflows, and JavaScript components.

Institute of Chartered Accountants in England and Wales (ICAEW)

Client: ICAEW

EDUCATION

Bachelor of Engineering (Electronics & Communication Engineering)
East Point College of Engineering & Technology, Bangalore

CORE COMPETENCIES

Dynamics 365 CE | Power Platform | Dataverse | Power Apps | Power Portals | Power Pages | Power Automate | C# | JavaScript | REST APIs | Web APIs | Azure DevOps | CI/CD | Security | Unit Testing | Agile Development | Business Process Automation | SDLC | Solution Design | Deployment | Agile
